## EXPERIENCE

### Carnivore Cruises, Professional Practice Project:

JANUARY 2018 - APRIL 2018

A collaboration between several student teams to develop a small–scale web application based on the travel site Orbitz. Developed a cruise line service API and web application and shipped it for integration to the main application team.

- Supported a cruise inventory access API on Google Cloud Platform for the main development team
- Created and maintained a Git repository for version control
- Developed a web application that consumed the inventory API as well as other open source APIs
- Created a SQLite database to store cruise voucher selections

## EDUCATION

### Mississippi State University, MS — *B.S. Software Engineering*

AUGUST 2016 - MAY 2018

### SkillCrush Web Development Course — *Online Certificate*

APRIL 2019 - AUGUST 2019

## PROJECTS

### Personal Portfolio Website — *2019*

Launched my first website using GitHub Pages feature. Includes on the site is several small projects showcasing skills with HTML, CSS, and JavaScript web pages

## SKILLS

- Full Stack Web Development
- SQL Database knowledge
- Version Control
- Bilingual

## TECHNOLOGIES

- Bootstrap
- Git & GitHub
- Visual Studio Code
- HTML & CSS
- Adobe Photoshop
- FTP & Web Hosting
- Virtual Machines

## LANGUAGES

- Python
- JavaScript
- C++
